**MYOPIA MANAGEMENT:
Special lenses orthokeratology
Pharmacological therapy
Prevention of Myopia**

Scientific program chair: Dr. med. Gudrun Bischoff & Marino Formenti, O.D.

DAKG & EurOK Congress Germany 2018

The good I so close by!

The European Academy of Orthokeratology (EurOK) and the German Ophthalmic Contact Lens Society eV (DAKG) cordially invite you to a very special „Hamburg Myopia Update“, with international flair and intense collegial exchange of experience across the continents. The congress offers simultaneous translation as well as training points!

**We would love to welcome you on October 20-21, in Hamburg,
Crowne Plaza Hamburg - City Alster Hotel
Graumannsweg 10
22087 Hamburg**

It will be exciting; we wish that every participant takes new, requested and refreshed science back home. This jointly organized congress of the two societies – EurOK and DAKG - focus intensively on myopia management and especially on „Special Lenses Orthokeratology, pharmacological therapy and other alternative methods“. The “myopia prevention” does also include children, the dry eye, morphology and pathology as well as marketing and communication lectures - especially in behalf of communication with parents of myopen children. Tips and tricks for contact lens fitting and complication treatment are not missing.

In the evening, Hamburg’s Hafencity attracts with its new landmark: the Elphi or Elbphilharmonie, our opera house, lovingly called. We look forward to hear speakers from Germany, Switzerland, Austria, the USA as well as England, Italy, Russia and the Turkey. And of course we are looking forward to meet YOU! Do not miss this highlight!

Dr. med. Gudrun Bischoff

President DAKG - German Ophthalmic Contact Lens Society eV

Marino Formenti, O.D., FIAO

EurOK President
